Hello, Gordon. I hope all is well with you.

I am introducing you to Janine MacGregor by copy of this email. Janine is the DEP project manager for the Passaic River dredging project, next to your former site in Newark. Would you please read her message to me, included below, about air monitoring activities at the Lister Ave site? Any help you can provide is appreciated.

Janine, there will be an air monitoring system in place for remediation activities. Dr. Gordon Kuntz is the Sherwin Williams project manager for the Lister Ave site. Gordon and/or his LSRP should be able to help you.

Please let me know if you need any follow up on my part.

Thanks,  
Steve

Hi Steve, I hear Sherwin Williams is supposed to start construction pretty soon. Do you happen to know if there is any air monitoring that will be going on during their work? I ask because the Removal Action has quite a bit of perimeter air monitoring required, and contingency plans for what to do when they get to certain levels (over background, which is being determined very soon). During the months that Tierra is dredging, there may be particulate impacts from the work at Sherwin that we may have to take into account....wondering if there are any opportunities to share data so we can determine if air impacts are from Tierra or background/Sherwin. So....any air monitoring happening? Janine
